

The waste sorting starts now!

At the moment we have craftsmen who are getting the areas ready for the new garbage shed. *But, we are putting out extra bins and marking the existing ones already, so everyone can start sorting their waste now.*

For this, you have been given a green bin and green bin liners for food waste. A compactor for plastic waste exists, if you want one, or want to try it, you can pick one up at the Administration. For those who were in the test area, you keep the green bin, but if you don't want/need the compactor, you can return it to the Administration.

If you need more green bin liners, you can pick them up at the Administration or the Resident's office. For their opening hours see aub.dk or Fiset.

From the test area we have some tips and tricks:

- Anything thicker than regular printer paper is cardboard (Pap)
- It is recommended you empty the green bin every, or every other, day
- You MUST close the green bin liner

If you are in doubt about how to sort anything, a list will be made on aub.dk/skrald, otherwise just put it in residual waste (restaffald).

An event will be held on the 13th of June from 1 to 3 pm on the big lawn. Here we will help with the sorting and answer questions.

If you don't have the folder on how to sort your waste, it can be found on aub.dk/skrald. There will be a list here with things other people have been in doubt on how to sort. There will, in time, be inspirational pictures from other residents on where to place all the waste fractions.
